EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Bryan Davidson on December 20, 2007.

The application has been amended as follows:

In the Claims:

In line 6 of claim 1, "characterized in that" has been changed to ---wherein---.

In line 7 of claim 1, ---in a condenser separate from the NH₃ separation device--- has been inserted after "out".

2. The following is an examiner's statement of reasons for allowance: The examiner agrees with applicant that the gaseous NH₃ stream exiting the rectifier in the EP '292 reference does not contain carbon dioxide. The prior art fails to disclose or suggest a motivation for the CO₂ condensation step in a condenser separate from the NH₃ separation device in combination with the other recited limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Drawings

3. The drawings were received on November 20, 2007. These drawings are approved.
